Ionic Bonding - Type II Nomenclature WS

Use the criss-cross method to find the formula for the following ions. Once you have found the formula, write the name of the compound.

	O^{-2}	Cl^{-1}	P^{-3}	S^{-2}	Br^{-1}	N^{-3}
Cu^{+1}	Cu^{+1} O^{-2} Cu_2O copper(I) oxide	CuCl copper(I) chloride	Cu_3P copper(I) phosphide	Cu_2P copper(I) sulfide	CuBr copper(I) bromide	Cu_3N copper(I) nitride
Fe^{+2}	FeO iron(II) oxide	$FeCl_2$ iron(II) chloride	Fe_3P_2 iron(II) chloride	FeS iron(II) sulfide	$FeBr_2$ iron(II) bromide	Fe_3N_2 iron(II) nitride
Pb^{+4}	PbO_2 lead(IV) oxide	$PbCl_4$ lead(IV) chloride	Pb_3P_4 lead(IV) phosphide	PbS_2 lead(IV) sulfide	PBr_4 lead(IV) bromide	Pb_3N_4 lead(IV) nitride

(Covalent & Type I Review) Write the formula for the following compounds:

Zn_3P_2 ___zinc phosphide_____ Al_2S_3 _____aluminum sulfide_____

$MgCl_2$ __magnesium chloride_____ C_4F_7 _____tetracarbon heptafluoride_____

KBr ____potassium bromide_____ Ag_2S _____silver sulfide_____

S_3O_7 ___trisulfur heptoxide_____ N_3O_8 _____trinitrogen octoxide_____
