VSEPR Worksheet

Determine the number of valence electrons, draw the Lewis Structures, tally up the bonding and lone electron pairs, identify the correct molecular shape and bond angle, determine if the molecule is polar or nonpolar, and state if the structure has resonance.

Molecule	# of Valence e^-	Lewis Structure	Bonding Pairs	Lone Pairs	Shape	Angle	Polarity	Resonance
SeO_3								
$[NH_4]^{+1}$								
$[NO_2]^{-1}$								

H_2O								
BF_3								
CBr_4								
$[SiS_3]^{-2}$
